The Heat Is On And Chiles Are Cool

August 14, 2010

This preview is preliminary but prospects are very good to excellent for the anticipated Fall, 2010 harvest. Please note that varieties marked as "Available" is that the seed is dry and ready to package. Because we visually inspect all seed before packaging and there are so many varieties, we will work on this process as we keep bringing in the harvest and preparing the fresh seed. Please see the KEY below for more info.

Key:

Available: Seed is dry and ready for packaging	
Coming Soon: Fruit are ready for harvest and seed should be ready in September, 2010	
Coming This Fall: Second harvest is setting and look for availability October/November.	
To Be Determined: Plants are stubborn but we do see bud.
